READI-J-V

Readiness Estimate And Deployability Index
Japanese-Version

Purpose: The purpose of the READI -J-V is to estimate out how ready nurses are for a disaster or terrorist attack in seven important areas: clinical competency; operational competency; survival skills; stress coping; attitude of mind; group integration; and leadership/administration support. It is important for you to be honest in your responses. Responses will be handled as a group and you will not be identified as an individual. The READI-J-V takes about 30 minutes to complete.

Instructions for completing the READI-J-V:

Read each question and select the most appropriate answer (by checkmark, circle, etc.) as indicated on the READI-J-V questionnaire

#1Clinical Competency (CC)

Shock

Choose the letter that indicates your level of competence on each of items listed below.

Not Familiar Somewhat Familiar Neutral moderately Familiar
Totally Familiar

1 How familiar are you with the different types of shock? 1 2 3 4 5

	or injured patients get seen first?
